DETAILED ACTION

This action is in response to the amendment received 2 December 2004 in which claims 1-10, 23-32, 48-74 are pending.

Reasons For Allowance

The following is an examiner's statement of reasons for allowance: The instant application is deemed to be directed to a nonobvious improvement over the invention patented in Kopinga (U.S. Patent No. 4,527,017) and/or Torgeson (U.S. Patent NO. 4,468,530). The improvement comprises a planar magnetic transducer comprising a secondary magnetic structure position on the opposing side of a primary magnetic structure with fewer magnets in such a manner that the secondary magnetic structure has more of an open architecture, the magnetic configuration affords the transducer having a single-ended or double ended over portions of the active diaphragm region, and the magnetic field strength being less or more along certain areas of the diaphragm by changing the spacing between opposing portions of the magnetic structure, as substantially described and connected with the other functional language recited in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
